

## Adding and Subtracting without Regrouping

Read the following questions and add or subtract to find your answers. For the math sentence, you must complete the ones place first before going onto the tens place value. Afterwards, write a "beautiful" sentence to answer each question.

1. Laylah has 21 marbles. Blade has 65 marbles. How many more marbles does Blade have?

2. It snowed 34 cm last week and 42 cm this week. How many cm has it snowed?

3. Hasib has 59 stickers. Jace has 26 stickers. How many fewer stickers does Jace have?

4. Niko has 35 dollars. Demitra had 67 dollars but she bought a present for Niko. If she now has the same amount of money as Niko, how much money did Demitra spend on the present?

5. Gavyn has 12 dollars. Parker paid 30 dollars for a toy so he now has the same amount of money as Gavyn. How much money did Parker have **before** he bought the toy?
