A Walk in Our Neighbourhood!

Read these questions and complete them with your family!

1. Take a walk around your neighbourhood. Write down the answers to these questions.
   a) How many trees are in your front yard? _____

   b) How many trees are on your neighbour's (either one to the left or right) front lawn? _____

   c) How many trees are on your neighbour's (the one across the street) front lawn? _____

   d) Using those tree numbers, write them down as a math sentence (for example: 5+4+1=10).

   _____

2. Continue with your walk and find 5 vehicles. How many tires are there altogether? _____

3. Now add together the address numbers on the next 5 houses.

Houses	Addresses	Math sentences
example	987	9+8+7=24
1.		
2.		
3.		
4.		
5.		

4. How many houses did you have to walk by before you counted 7 cars parked in the front? _____

5. How many windows are on the front of 3 houses? _____
