

## Word Problems with No Regrouping #2

Read the following questions and add or subtract to find your answers. For the math sentence, you must complete the ones place first before going onto the tens place value. Afterwards, write a "beautiful" sentence to answer each question.

1. Ben has 35 stickers. Bisma has 69 stickers. How many more stickers does Bisma have?

2. In a school survey, we found that 24 people liked chocolate ice cream, and 76 people liked strawberry ice cream. How many more people liked strawberry than chocolate ice cream?

3. Lexie has 23 dollars. Andrew paid 44 dollars for a toy so he now has the same amount of money as Lexie. How much money did Andrew have before he bought the toy?

4. April has 32 dollars. Her sister had 55 dollars but she bought a present for April. Now she has the same amount of money as April, how much money did she spend on the present?

5. Emi is on square #20 on the board game. She rolls the dice and gets a 12. What number will she move to on the board?
