

Name _____

Human Scale

You are going to use your arms as a scale. A scale will go up on the side is the object is lighter. The scale will go down on a side is the object is heavier. You need to compare and order your objects from lightest to heaviest.

Place an object on each hand. Which object is lighter? Switch out one object and see heavier or lighter. Do this with all the objects and put in order from heaviest to lightest.

Record on the Chart.

Order your objects from lightest to heaviest:

| |
|----|
| 1. |
| 2. |
| 3. |
| 4. |
| 5. |
